Welcome

Welcome to our Summer newsletter of 2019. I can't believe that we are already half way through the year.

As we all know retail is still taking a beating and many companies are restructuring to survive. The retail landscape is rapidly changing but that's not always a bad thing for longevity. Change is good as long as we embrace it and work to maximise the situation one finds themselves in.

With that said, we understand the challenges that you are facing and we here to support you all through this in any way we can. We are aware that you need your budgets to stretch further without compromising design, quality and service and we are here to help you achieve this. Don't forget that we also have many strings to our bow, so please bring your projects to us in case we might be able to help.

You will see in this issue that we have embraced new technologies and are also continuing to launch new and innovative products. Our ability to make your dreams a reality is quicker than ever.

I am excited about the launch of our new hire website which is designed to give you a simple view of mannequins for hire or immediate sale for press days, pop ups and the like. All items are housed in our London hub.

Don't forget to keep checking this website and our standard website as they are both constantly being updated. You can also follow us on Instagram, Twitter and Facebook to see our newest and most exciting products and projects.

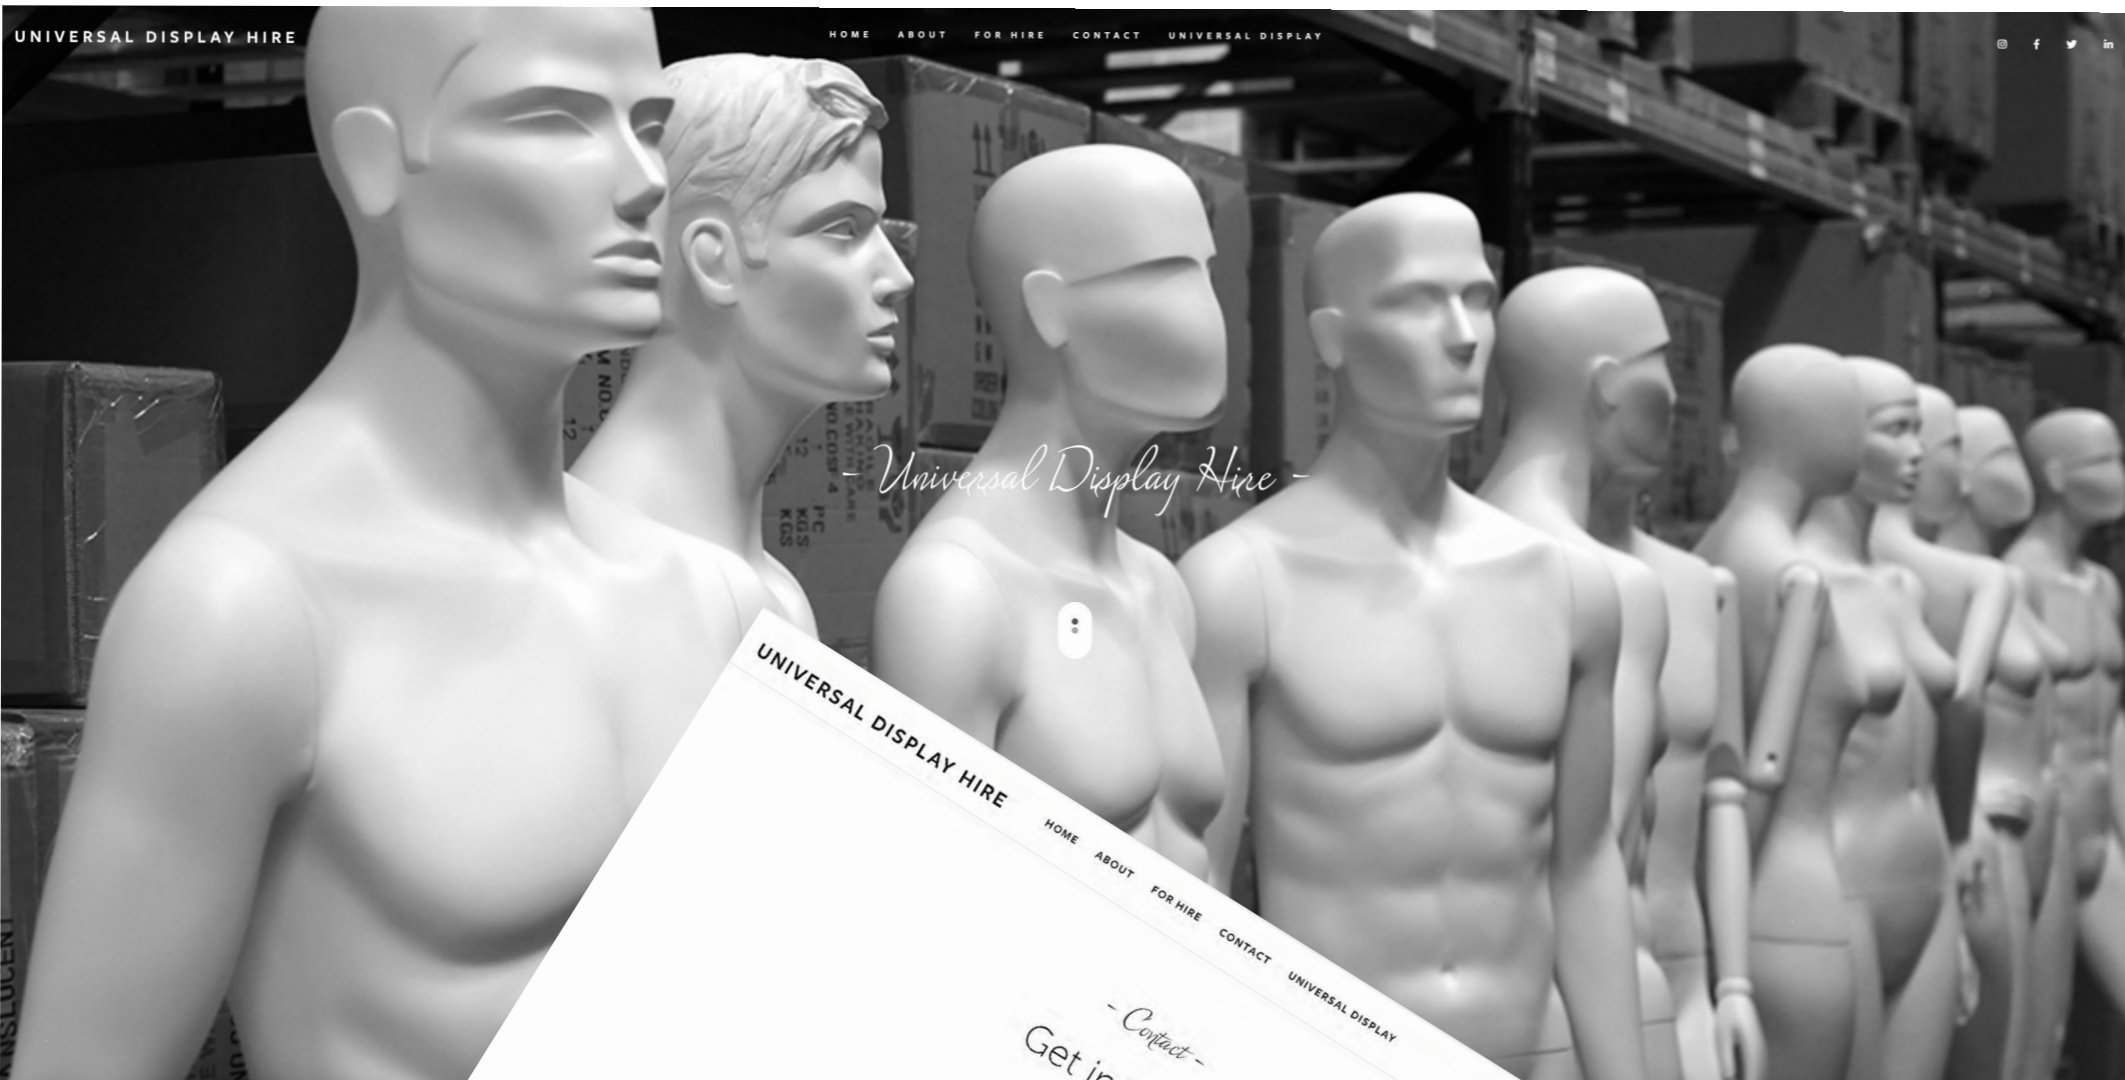

As always, we have tried to present you with an informative newsletter and hope that you enjoy it.

Jonathan

Three sleek, silver, headless mannequins are displayed in a modern, minimalist setting. The mannequins are positioned in a row, each in a different pose. The first mannequin on the left is turned slightly to the left, the middle one is facing forward, and the one on the right has its arms crossed. They are set against a background of dark, angular architectural elements and horizontal white lines. The lighting is dramatic, highlighting the metallic sheen of the mannequins.

SERIES M1
UNIVERSAL DISPLAY

NEW UNIVERSAL DISPLAY HIRE WEBSITE

At Universal Display we make great mannequins, but we also hire them out for press shows, pop-ups, fashion events & films. We have recently reworked our 'Universal Display Hire' website to give real time stock content. Take a look and please let us know if we can be of help. Of course, you can also buy anything you see too for immediate delivery.

FAST PROTOTYPING

We now have the ability to sculpt & print a working prototype in just two weeks.

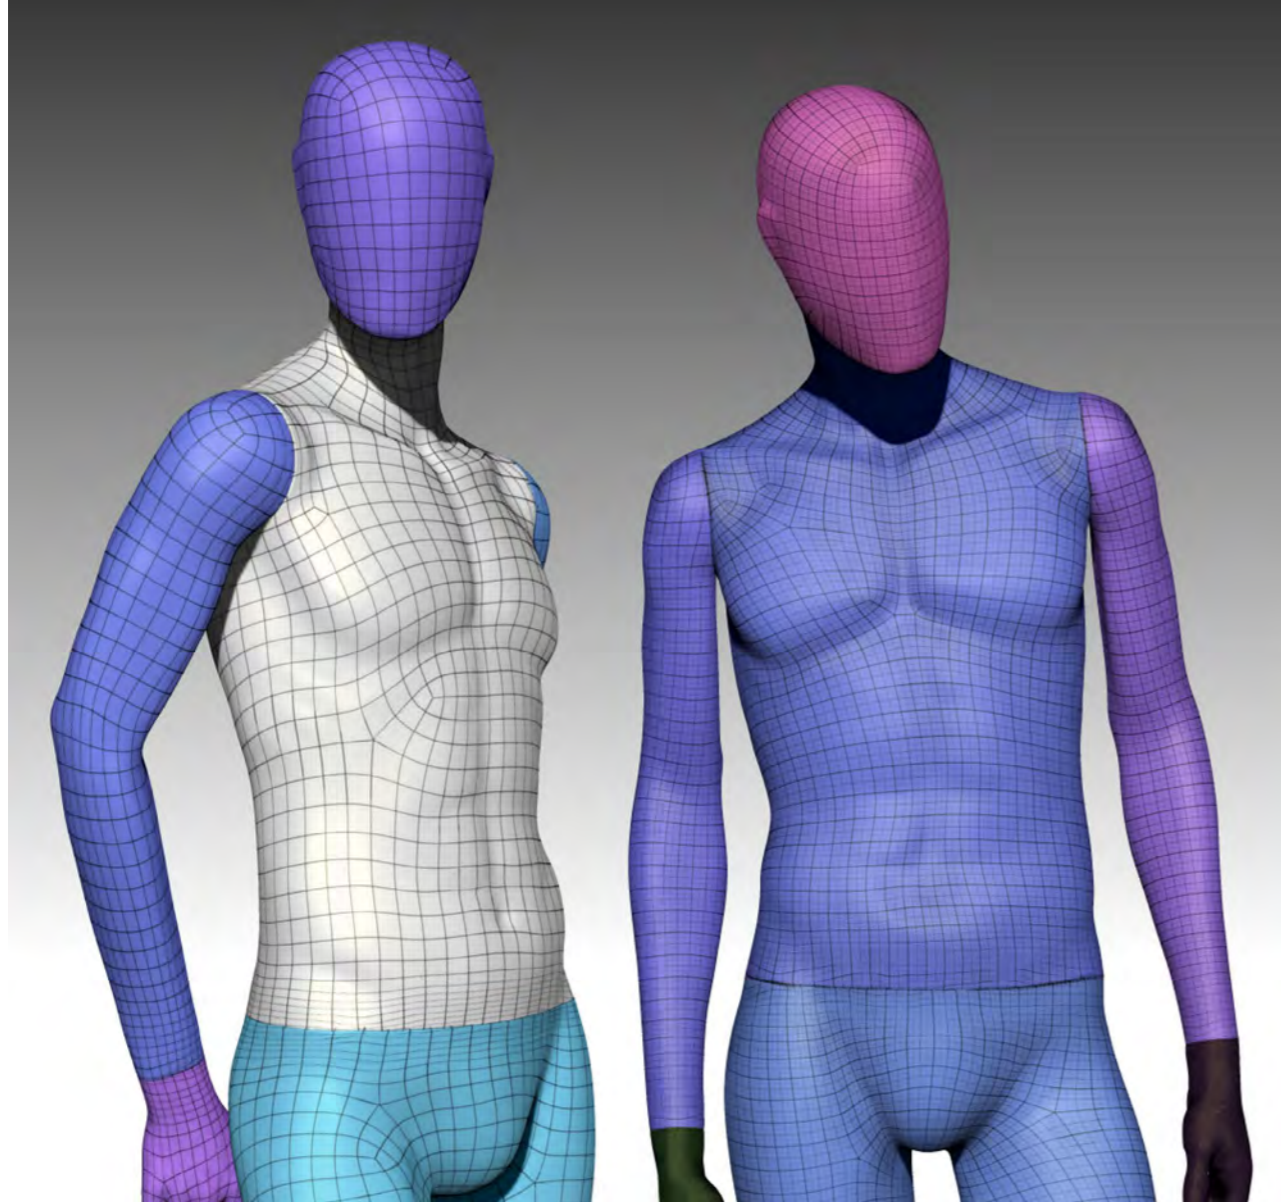

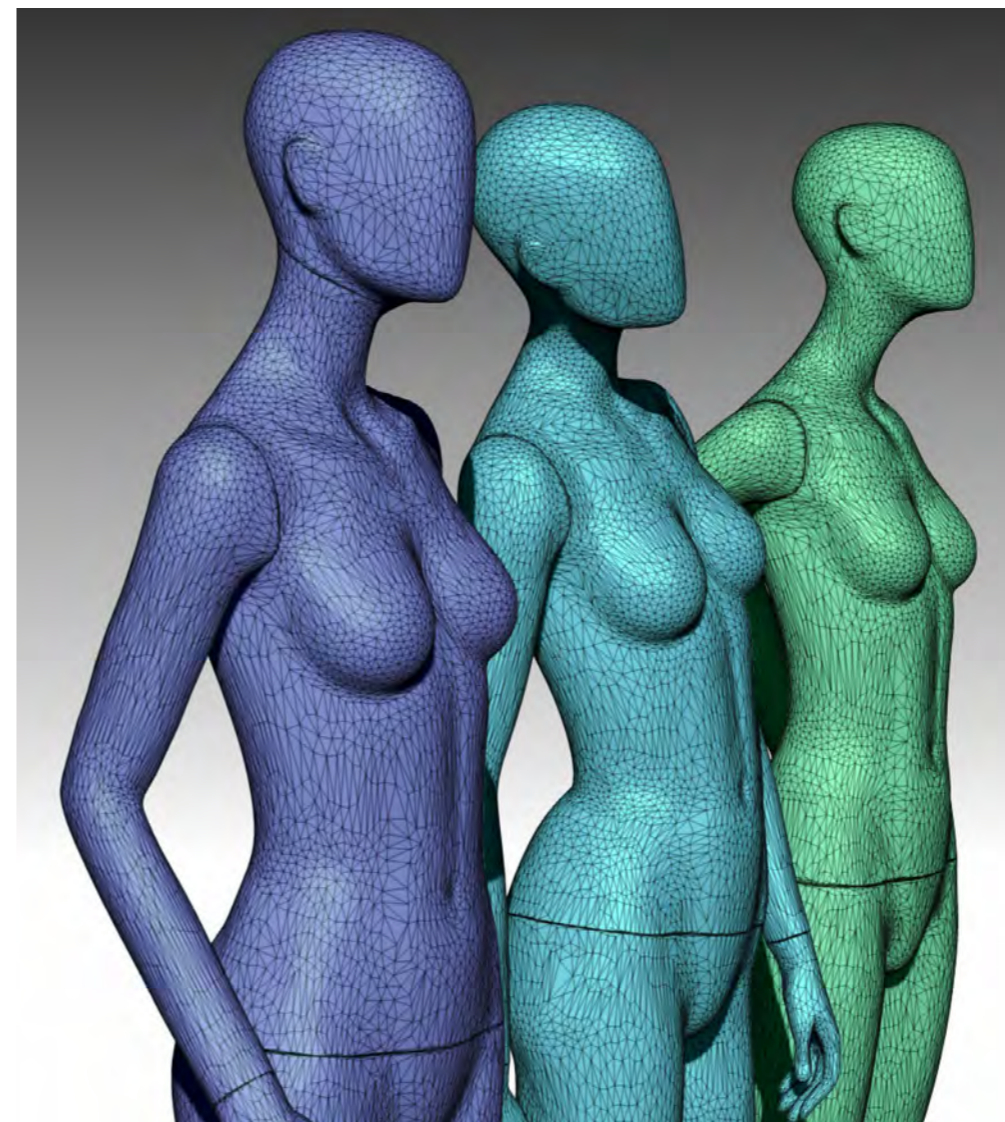

”

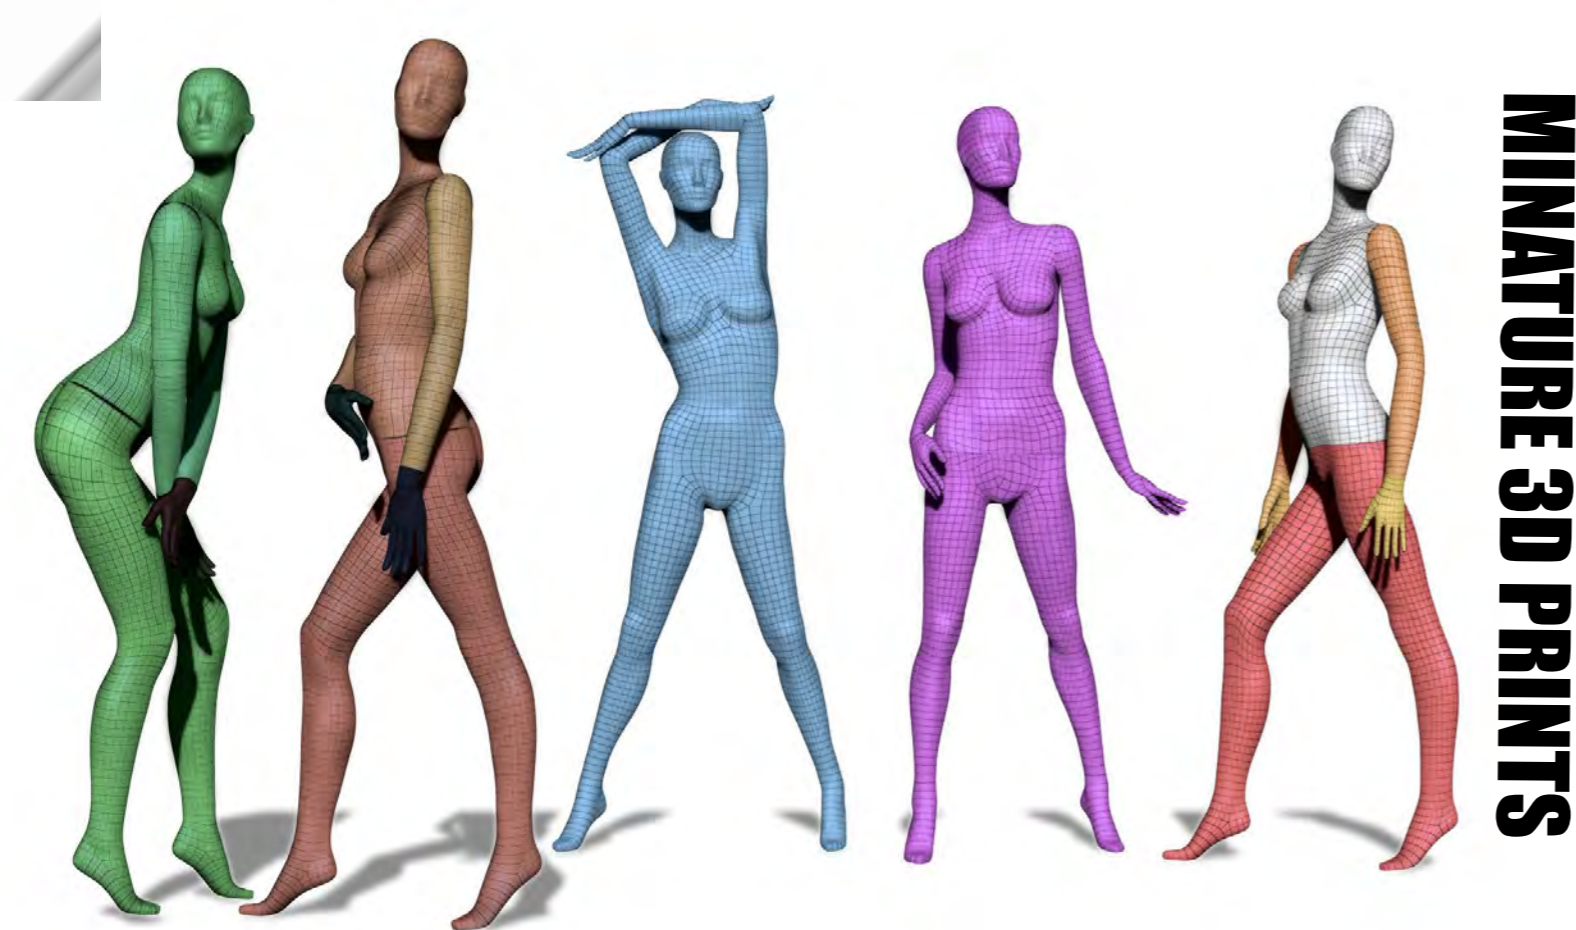

BESPOKE MANNEQUINS

Here at Universal Display we have continued with our integration of digital sculpting, scanning and 3D prints into our work-flow.

We still use the traditional clay methods that have been used for hundreds of years, to originate some of our designs, but more and more often we are using digital output, to achieve outstanding results for our customers.

From bespoke mannequins to props, we have been able to realize prototypes that go into production far faster than ever before.

MINATURE 3D PRINTS

We can sculpt mannequins, props and rapidly prototype them as miniature 3D prints for our customers to see before printing at full size. We have found this option very helpful as it allows customers, directors or stakeholders to see what their vision and ideas will look like. Once the prototypes have been realised and approved we can then roll them out into the production stage, this stage facilitates scalability in numbers and finishes.

We can develop and
print props scaled to
any size required.
Let us know your ideas
& we will do the rest.
